About the Course

Course aim

To provide Consultant Radiologists with a practical, stimulating and comprehensive update on advanced interpretation and reporting practice in HPB:

- **practical** (workstation based learning with **100s of cases**);
- **stimulating** (interactive, challenging cases, immediate feedback); and
- **comprehensive** (covering a full range of HPB imaging topics).

Target audience

The course is pitched at a level suitable for consultants and senior STs in radiology.

Learning outcomes

By the end of the course, the attendee will have:

- a comprehensive understanding of best practice in HPB imaging;
- improved confidence in differential diagnosis of common and rare HPB pathology
- improved image interpretation and reporting skills;
- up-to-date with the with the latest clinical and radiological guidelines in HPB disease

Course highlights

- Faculty of practicing consultant radiologists, experts in their fields, with extensive experience in advancing the HPB skills of peers nationally and internationally.
- No long didactic lectures – short introductory lectures highlighting salient features with the main emphasis on interpreting and learning from the 100's iMac OsiriX workstation-based cases
- Comprehensive - covering a full range of HPB topics, from the everyday to once-a decade cases
- True peer interaction/learning - 2 attendees per iMac workstation and a limited number of delegates
- Stimulating, interactive, challenging cases

Sessions

Each session consists of:

- A brief introduction by the session lead.
- Cases interrogated on iMac workstations (2 delegates per station)
- Cases then reviewed by session lead whom will provide:
